

PRODUCT INTRODUCTION

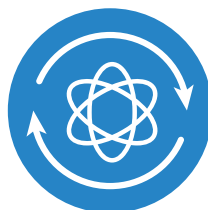

Cross-belt sorters have been formed into various types such as straight-line cross-belts, single/double-sided circular cross-belt sorters, etc., which are suitable for sorting various items from flat items to small pieces of mail, from package mail to express heavy items.

FEATURE

CUSTOMIZATION

INTELLIGENTIZATION

EFFICIENCY

CIRCULAR CROSS BELT SORTER

Suitable for mail sorting of large and small pieces with different specifications.

Maximum Line Speed: 3m/s

Maximum Parcel Weight: 35kg

Single Layer Sorting Efficiency: Maximum To 28800p/h

LINEAR CROSS BELT SORTER

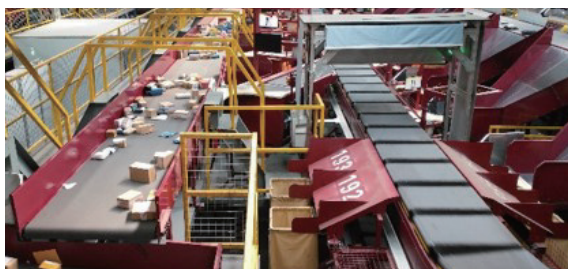

An intelligent cross-belt sorter with a high degree of space utilization. Suitable for narrow and long processing site.

Maximum Line Speed: 2m/s

Maximum Parcel Weight: 30kg

Processing Efficiency : Maximum To 10000p/h

BUDGET CROSS BELT SORTER

It's suitable for express mail and warehouse processing centers with relatively low sorting efficiency requirements and more sorting directions.

Maximum Line Speed: 2.2m/s

Processing Efficiency: Maximum To 20000p/h (Double-end Supply)
